Wiha – our goal: your success

- **Your guarantee for quality**

Winner of the Manufacturing Excellence Awards 2014 as the best SME in Germany.

- **Reliable and dependable**

German family-owned company with more than 80 years of experience.

- **Your advantage**

Customised problem-solving for professionals.

- **Cutting-edge technology**

Award-winning innovations valued by professionals throughout the world.

What makes your work easier? Tools that increase your efficiency, reduce costs and preserve your health. This is why Wiha develops, designs and manufactures products that meet the highest functionality, durability and ergonomic demands.

Founded over 80 years ago as a small family-owned business for standard parts and screws, Wiha has grown to become a global company with factories all over Europe, Asia and the United States and are still owner-operated by the Hahn family.

Wiha offers the professional a wide range of high-quality premium tools, characterized by their use of the latest manufacturing technologies, application-oriented innovations, ergonomic superiority, top quality, absolute reliability and long service life. In short, tools that make your work noticeably easier - tools that work for you.

Wiha visions and values

With responsibility and innovation, Wiha is set for a successful future.

What makes a company successful? Providing excellent products and having a good company culture are key. The high quality of Wiha tools in their form and functionality is confirmed by the many international awards they have received. As an owner-operated family-owned company, we foster a culture of togetherness. From employee development to active customer management, Wiha does everything they can to create optimum working and business conditions and a foundation for sustainable success.

As a member of the BME Compliance Initiative, Wiha complies with a code of conduct which obligates the company to follow business conduct rules, principles of social responsibility and the obligation to promote suppliers, ensuring the lawful behaviour of the company and its employees.

In 2016, Wiha was crowned one of the TOP 100 most innovative mid-sized companies in Germany. Thanks to their practised culture of innovation, Wiha was able to succeed at the competition held as part of the "German Mid-Sized Company Summit." We took this as encouraging confirmation of our company philosophy, which focusses on progress and vision.

Wiha – our visions

- **A financially successful family-owned company**

For more than 80 years, Wiha has been a successful owner-operated company in the market.

- **Premium international brand**

Wiha supplies an international market from factories in Europe, Asia and the USA.

- **Highly motivated first-class team:**

Wiha employees are competent, committed and motivated thanks to their optimum working conditions.

- **User- and application-focused:**

Wiha products enable the user to work in an efficient and health-friendly way.

Wiha design awards

Ergonomics, highly prized by all.

To us, positive feedback from people for whom we make our tools is the most rewarding confirmation of our work. All the same, we can also be more than a little proud when the high ergonomic quality of our products is confirmed at the "highest" level, as many of them have been distinguished with coveted design awards. In addition to this, our company and production quality were also honoured with awards. With this praise and confirmation from every direction, it's no wonder that Wiha are on the right track with ergonomic tool concepts and a future-oriented philosophy.

Wiha tools with AGR approval

The world's first tools awarded the seal of approval for efficient and health-preserving work.

Geprüft und empfohlen vom Forum: Gesunder Rücken - besser leben e.V. und dem Bundesverband deutscher Rückenschulen (BdR) e.V. Weitere Infos bei: AGR e.V., Stader Str. 6, 27432 Bremervörde, Tel. 04761/92 63 580, www.agr-ev.de

Ergonomic excellence! Wiha is the world's first hand tool manufacturer to receive the AGR seal for its Inomic® pliers and ergonomic handle design on screwdrivers. This distinction enjoys broad acceptance by medical professionals

Ergonomic excellence - The Wiha screwdriver handle size concept and Wiha Inomic® pliers handle concept. When you are the first hand tool manufacturer in the world to have products distinguished with the renowned AGR quality seal, it's a sensation. Very few everyday objects are able to pass the stringent tests of the AGR, whose seal enjoys broad acceptance by medical professionals for very good reason.

For years, the AGR have been dedicated to promoting and researching the prevention of back pain and they offer recommendations on products which help to prevent musculoskeletal disorders and back pain.

Wiha have now been officially recognised for their ergonomic screwdriver handle size concept and Inomic® pliers handle concept. To us, this distinction is confirmation of our philosophy: To develop tools enabling the professional to not only work efficiently, but also in a health-preserving way. Wiha's screwdriver handle size concept features four handle sizes and lengths, each optimally suited to its respective fastening or work task to ensure healthy work. The angled "pistol handle" of the Wiha Inomic® pliers handle concept relieves the user's wrist while working.

Both handle concepts help users to reduce, or even fully prevent, discomfort in their musculoskeletal system and pain in their joints and muscles. The result? With Wiha, your work is easier, you don't get fatigued as quickly, you work more efficiently and you simply feel better at the end of the working day. As our campaign logo motto goes: "I feel Wiha!"

Wiha SoftFinish® handle sizes

Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.

Quick-turning - Motor skills are consistently taken into consideration.

Maximum power transmission, comfortable to use and without loss.

Maximum power transmission, comfortable to use and without loss.

To work safer, more efficiently and with less strain on the body.

Certified safety – from our own safety testing procedure according to IEC standards.

Voltage testing: All Wiha VDE-tools, which have special markings, are individually tested at 10,000 V AC and are approved for 1,000 V AC and 1,500 V DC.

Cold shock test: Cooling down to -25° C. The skinning material must retain its toughness, so that it doesn't break when subjected to shock and knocks.

Test of electrical skinning properties: 24 hours storage in water, then 3 minutes test at 10,000 V AC. There must neither be flashover nor disruptive discharge.

Test of the adhesion of the skinning material coating: 168 hours storage at 70° C, then test of adhesion at 500 N.

Pressure tests: Test at 20 N pressure load, 70° C temperature and 5,000 V AC test voltage. No disruptive discharge may occur.

Test of combustion behaviour: The tools are subjected to a flame for 10 seconds. The skinning material must then extinguish and not continue to burn.

Safety note

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

As an internationally recognized institute, the VDE is responsible for the testing and certification of electrotechnical products. Wiha provides the professional with a broad range of VDE products, developed and continuously optimized specifically for electricians, which also provide application-oriented solutions for everyday use.

The Wiha quality-management system according to ISO 9001:2015 ensures that only first-class products are manufactured – and that you can work with products of excellent quality. To ensure maximum safety for the user, the entire Wiha VDE range must undergo the most stringent inspections and individual tests. All Wiha VDE-tools hold multiple certifications: The VDE-GSmark stands for safety with regard to any risk, from electrical right up to radiological. Products labelled with a double triangle and a voltage range are suitable for work with live parts.

The international standard IEC 60900 defines the construction, safety as well as single, series, and random testing of insulated tools. But with Wiha you don't just work safer, but also healthier and more efficiently. Specially developed ergonomic geometries ensure comfortable handling that protect the body from strain. The result: easier work, less signs of fatigue, more efficiency.

Ranges

Designed for those who work with it.

The experiences of the user are taken into account right from the product development stage at Wiha tools. This ensures high-quality tool sets are designed for mechanics, electricians and electronics technicians which have been specifically compiled for their particular requirements and applications. Neatly stored and clearly organised in robust, compact tool bags, tools are ready at hand, ensuring work is completed easily and efficiently.

Wiha tools prove to be very handy, essential companions stored in a Wiha tool case, where the limitations of conventional tool cases have been eliminated: thanks to its practical tool pockets and extra storage space for small parts, the Wiha tool case provides simple, strain-free transport of your tools, offering greater convenience to make your work easier in every respect.

Manufactured acc. to IEC 60900.

INFOBOX: VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

disconnect

- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

INFOBOX: OptiGrip

Wiha OptiGrip – optimal grip due to newly designed gripping surfaces

- A firm hold: The „triple-point support“ protects the workpiece from twisting or slipping.
- Highly effective: Optimum grip even with large jaw opening – and at the same time significantly less force needed.
- A wide selection: Now in standard Wiha combination pliers and high leverage combination pliers.

Electro

Safety for professionals.

With the speedE® e-screwdriver, Wiha is revolutionising the screwdriver market. Whether handling delicate fastenings, long screws or very many screws, professionals have no trouble working with the e-screwdriver. The material protection function in particular makes the speedE® unique: At 0.4 Nm the electrical assistance stops automatically and allows the user to finish tightening the screw carefully by hand. In combination with the VDE certified slimBits the speedE® offers electricians full protection during their daily work.

The swivelling Wiha flashlight features an integrated laser, UV light and LED light with two lighting levels.

With Torque QuickCheck, Wiha is bringing the first portable quick tester for regular checks on torque tools onto the market, thus guaranteeing safe and precise work.

INFOBOX: Wiha speedE® II

E-screwdriver, speedE® II electric

- 3x faster than manual fastening.
- Made in Germany.
- Safe working up to 1,000 V AC.
- Manual torque fastening up to 12 Nm.
- Powerful ring LED light.
- Replaceable standard battery.
- Kind to hands and muscles.
- Fully compatible with the Wiha slimBit system.

INFOBOX: Wiha speedE®

E-screwdriver speedE®

- Power-assisted screw-driving halves working time.
- Thanks to the integrated material protection function, the electric assistance stops automatically at 0.4 Nm.
- Final screw tightening can then be carried out by hand.
- Recommended by doctors and therapists.
- slimBits tested at 10,000 V AC and approved for 1,000 V AC.

INFOBOX: Torque QuickCheck

Wiha Torque QuickCheck

- The Wiha torque screwdriver can quickly and easily test torque screwdrivers to check the precision of the configured torque value before each use.
- Checking tools regularly ensures reliable, precise work.
- The device offers user-friendly operation, clear test readings and easy to understand LED traffic light signals.
- Thanks to a compact, handy shape, it is the ideal companion when out on jobs.
- Suitable for all Torque Vario®-S and iTorque® torque screwdrivers whose torque range included 2.8 Nm.

Screwdrivers

We have the know-how at the tip of our fingers.

Unlike many standard tools available on the market, Wiha screwdrivers are optimally designed for users' requirements. Thanks to Wiha's screwdriver handle size concept, four handle sizes and lengths, optimally adapted to their specific fastening or work task, ensure health-friendly work practices. With SoftFinish, Wiha became the world's first and only hand tool manufacturer to have products honoured with the renowned AGR quality seal - a seal of approval accepted by medical professionals and officially recommended by doctors and therapists. Wiha screwdrivers featuring SoftFinish are available for dry applications, damp and oily applications and as VDE-certified, insulated screwdrivers for use when working on live parts.

Wiha is the world's first hand tool manufacturer to receive AGR (Association for healthy backs) certification for its Inomic pliers and ergonomic screwdriver handle size concept, a seal of approval accepted by medical professionals and officially recommended by doctors and physiotherapists.

INFOBOX: Handle size concept

Wiha SoftFinish® handle sizes

- Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.
- Quick-turning - Motor skills are consistently taken into consideration.
- Maximum power transmission: comfortable and loss-free transmission of physical strength, even during intensive fastening.
- The power-turning and quick-turning zones (length) vary significantly over the four handle sizes in various forms.
- The Wiha SoftFinish screwdrivers enable work that is kind on the hands and muscles and is therefore recommended by doctors and therapists from the AGR.

INFOBOX: VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

insulating personal protective equipment

- insulating safety mechanisms
- insulated tools
- Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

disconnect

- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components
- Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

Order-No.	
21250	1
⊖	3.5 mm x 75 mm / 4.5 mm x 90 mm / 5.5 mm x 100 mm / 6.5 mm x 125 mm
⊕	PH1 x 80 mm / PH2 x 100 mm

Slotted with one-piece hexagonal blade and solid steel cap

530ZK6

Order-No.	
21251	1
⊖	4.5 mm x 90 mm / 3.5 mm x 75 mm / 5.5 mm x 100 mm / 6.5 mm x 125 mm
⊕	PZ1 x 80 mm / PZ2 x 100 mm

INFOBOX: Solid steel cap and hexagon head

- The solid steel cap at the end of the screwdriver handle enables targeted hammering, e.g. to loosen jammed screws.
- The direct connection of the solid steel cap to the blade means that the impact energy is transmitted without any loss.
- Blade includes a hexagon bolster for using a set of spanners for additional torque.

INFOBOX: Wiha MicroFinish screwdriver

The specialist for wet and oily applications.

- Due to the micro-fine surface structure of the screwdriver handle, the user can gain an optimal hold, even with oily or wet hands.
- The position of the soft and hard zones on the handle also supports the perfect grip for quick and powerful turning.

INFOBOX: Electrostatic conductive ESD tools

Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of $10^6 - 10^9$ ohms.

Torque tools

Controlled power for greater security.

The correct torque prevents damage to materials, eliminates the need for retouching and protects against warranty claims. This makes fully certified Wiha torque tools essential for mechanics, electricians and electronics technicians as they combine precision with security: with a release accuracy of $\pm 6\%$ for the pre-set scale value, Wiha torque screwdrivers satisfy standard precision requirements.

Torque tools with fixed settings increase process reliability while tools with variable settings are particularly ideal for mobile use. A special interchangeable blade system offers interchangeable blades with different drives. Guaranteed individual item testing using the manufacturer's inspection process and individual item marking with an identification number attest to the high quality and manufacturing standard of the tools.

**INFOBOX:
VDE-certified tools**

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

Multitools

Many talents in the minimum space.

Fewer tools mean less load, better handling and efficient work. The more a tool can do, the better: Wiha multitools are compact, versatile tools which save space and reduce overall weight, making them the perfect portable companion.

In the Wiha LiftUp magazine bit holder, the most commonly used bits are neatly stored in the handle, ensuring they are always ready for use and easy to handle. The Wiha reversible blade system offers a variety of interchangeable blades, the lengths of which can be adjusted as required. The small, compact Wiha PocketStars contain the most commonly used L-keys - indispensable helpers for all equipment. The Wiha Stubby magazine combines six drive formats in one, allowing completely unrestricted access to all confined spaces thanks to its extremely short screwdriver handle.

INFOBOX: LiftUp 26one®

Most of the world's common drives in one tool!

- The LiftUp 26one® has 13 double bits
- The bit magazine opens out at the press of a button, enabling the removal of the bits.
- Unlimited access to low-lying screws thanks to the automatically locking SuperSlim bit holder.
- Powerful screw fastening or loosening thanks to the large screwdriver handle.

L-keys

Difficult to access - easily solved.

Wiha L-keys are essential for all users who are faced with a screw fastening task in difficult work conditions. For difficult-to-access screws Wiha L-keys with a shortened L-key arm prove themselves to be ideal. The risk of injury is significantly reduced as the hand-working space is increased by over 30%.

Wiha ball-end tools enable fastening at angles of up to 25° per side. The risk of an accident is reduced since the tool does not slip out of the screw. Screws made of steel and non-magnetic materials are securely held in any position with the Wiha MagicRing and MagicSpring.

INFOBOX: Tools in fluorescent colour

- Coloured bits and ErgoStar with coloured L-keys light up under a UV light.
- Ensuring misplaced tools are quickly and easily found again.
- The Wiha flashlight with a UV light makes the perfect complement to coloured fluorescent tools.

INFOBOX: ErgoStar

The right L-key after just one turn.

- One turn of any L-key and all L-keys are ready for removal.
- Solid stopping point for fixing L-keys in the holder.
- Innovative clamping ensures L-keys are held firmly in both a closed and open position.
- Compact design saves space on the work bench or in the toolbox.
- Wall bracket for practical storage of the ErgoStar holder in the workshop.

Bits

The indispensable three.

Which machine? Which application? Which bit? The revolutionary Wiha bit concept puts an end to any confusion and presents three bit types which can cover all areas of use.

Only the screw shape is crucial for selecting the bit. The Y bit is ideal for fastening Y-shaped screws with an angle no greater than 90° between the thread and screw head. The T bit is used for T-shaped screws at a 90° angle. If you need to fasten both screw types, then the TY bit is the right choice since this universal bit is suitable for all type of fastenings.

A selection of different bit holders and bit boxes such as the BitBuddy® and XLSelector ensures optimum usage of bits.

Application

INFOBOX: BitBuddy 29

Easy, single-hand operation.

Attaching:

- Bits are directly picked up with the machine from the BitBuddy.
- Gets your fastenings done.

Storing

- Bits are easily returned to the BitBuddy, by pressing on the red bit strip.
- With magnetic bit holder for a rapid bit change.
- BitBuddy is always at hand - easily fits into trouser pockets or onto the belt clip.

INFOBOX: Wiha TY bit concept

- Bits quickly and easily selected thanks to the screw head shape.
- The T bit is ideal for fastening T-shaped screws with an angle of 90°.
- The Y bit is ideal for fastening Y-shaped screws with an angle not equal to 90°.
- Universal in its use, the TY bit is suitable for all types of screws, no matter whether they feature a Y-shaped or T-shaped screw head.

INFOBOX: Ball end hex

Wiha hexagonal ball end

- The ball end can be rotated by up to 25° in both clockwise and anti-clockwise direction.

INFOBOX: TORX® tamper-resistant safety profile

- This safety profile is used to hinder unwanted access to equipment such as intercoms, thermostats and night-storage heaters.
- You can fasten the Torx® tamper resistant profile with both Torx® H screws and normal Torx® screws.

INFOBOX: MagicRing®

Wiha MagicRing®

- Spring steel ring reliably holds hex screws in place
- An innovation, which will benefit each user.

INFOBOX: TORX® ball end

Wiha TORX® ball end

- With optimised TORX® ball end geometry
- Increased strength thanks to the special cold forming on a system developed by Wiha especially for this purpose.
- Allows fastening and unfastening at angles up to 25°.
- Simple insertion of the tool/bit and fastening/ unfastening, especially in hard-to-reach positions.
- Broad product range: As an L-key, as a bit and as a SoftFinish® screwdriver.

INFOBOX: Pentalobe

The security profile for Apple devices.

- Ideal for repairing Apple smartphones, tablets and notebooks.
- Note: The guarantee and warranty conditions of the device manufacturer must be observed.

INFOBOX: Drive systems and matching bits

Bit holder	suitable for
CentroFix Force	C 6.3, E 6.3 and 1/4" drives
CentroFix SuperSlim	C 6.3
MagicFlip Force	C 6.3

INFOBOX: CentroFix Force

- CentroFix Force
- Suitable for all bits with 1/4" hex drive style C6.3 and E6.3.
- SelfLock: The bit is locked mechanically and held securely when inserted.
- EasyOut: When unlocked, the bit moves into the ideal removal position.

INFOBOX: CentroFix SuperSlim

- Up to 30% reduced outer diameter compared to "conventional" quick release holders.
- Improved screw accessibility in confined holes.
- SelfLock: The bit is locked mechanically and held securely when inserted.
- EasyOut: When unlocked, the bit moves into the ideal removal position.

Mechanical Tools

Tight fastening – easy opening.

Opening tightly fastened screws requires great force. With the leverage action from Wiha's ring ratchet open-ended spanner, the user can easily open any fastening. The jaw end is also excellently suited for tightening screws and nuts. Similarly, when working with the ring ratchet, the user benefits from the fine toothing with 72 teeth, offering a short return angle and highest comfort when working in confined spaces due to the double hex design.

The combination of all standard nut driver sizes and various bits in a sorting system based on the L Boxx, accommodates all work activities and easy mobility.

Made of high quality chrome vanadium steel, the mechanical tools are distinguished by their longevity and robustness, not the least thanks to their corrosion-resistant and easy to clean surface.

Pliers

A cut above the rest for your health.

Wiha pliers combine high-quality materials with ergonomic comfort. Precise interaction between the joints and the exact workmanship of the blades and gripping surfaces ensure optimum functionality. Ergonomically designed and crafted to a high quality standard, they are comfortable to use, causing less body fatigue and thus making work more efficient.

The “OptiGrip” triple-point support design for combination and high-leverage combination pliers ensure an optimum, secure hold when handled. The circlip pliers from the Classic Series with their MagicTips® precision tips made of high-performance steel provide added safety and stability. With its angled plier shape, the Wiha Inomic® VDE product line is kind to the user's joints, muscles and tendons. Wiha also supplies suitable tools for stripping, skinning and crimping.

INFOBOX: VDE-certified tools

Wiha VDE-tested tools are subject to stringent safety test procedures.

All tools with the special marking have been tested at 10,000 V AC and are therefore approved for use at 1,000 V AC and 1,500 V DC.

The following equipment is required for all work on or around live components and should be appropriate for the specific task

- insulating personal protective equipment
- insulating safety mechanisms
- insulated tools

Before starting work, you must disconnect all active, live components of electrical machines and equipment and ensure that they remain disconnected while you carry out the work.

This is achieved by complying with the five safety rules:

- disconnect
- secure against reconnection
- ensure power is switched off
- earth and short-circuit
- cover or block off adjacent live components

Certified by the VDE Testing and Certification Institute and individually tested according to the international standard IEC 60900.

INFOBOX: DynamicJoint®

Wiha DynamicJoint® – A new dimension in strength and durability

- Innovative: Optimised joint construction.
- Effective: Minimal power loss means less force needed for cutting.
- Permanent: Optimal performance even after thousands of cuts.

INFOBOX: Heavy-duty diagonal cutters

with switchable opening spring

- Up to 40% more cutting force thanks to optimised leverage.
- Opening spring with on/off function for fatigue-free work.
- Opening spring can be activated with just one hand.

INFOBOX: OptiGrip

Wiha OptiGrip – optimal grip due to newly designed gripping surfaces

- A firm hold: The „triple-point support“ protects the workpiece from twisting or slipping.
- Highly effective: Optimum grip even with large jaw opening – and at the same time significantly less force needed.
- A wide selection: Now in standard Wiha combination pliers and high leverage combination pliers.

INFOBOX:
Stripping tool,
automatic up to 16mm²

- These pliers can handle a wide range of cables, thus combining two pairs of pliers in one.
- The supplied damper can be used to lessen recoil caused by larger cable gauges, such as those greater than 6 mm², thus helping to protect wrists.
- Precise cutting to length thanks to adjustable longitudinal stop.
- Integrated hand protection along the cutting edge guards against injury.

INFOBOX: DynamicJoint®

Wiha DynamicJoint® – A new dimension in strength and durability

- Innovative: Optimised joint construction.
- Effective: Minimal power loss means less force needed for cutting.
- Permanent: Optimal performance even after thousands of cuts.

INFOBOX: OptiGrip

Wiha OptiGrip – optimal grip due to newly designed gripping surfaces

- A firm hold: The „triple-point support“ protects the workpiece from twisting or slipping.
- Highly effective: Optimum grip even with large jaw opening – and at the same time significantly less force needed.
- A wide selection: Now in standard Wiha combination pliers and high leverage combination pliers.

INFOBOX: Plier wrench

- Required width setting directly on the work piece with no need to press any buttons
- Ratchet principle allows users to fasten screws rapidly with a simple glide.
- Thanks to its slim design and button-free setting, it is ideal for use in tight spaces.
- Smooth, parallel-acting jaws prevent damage on sensitive surfaces.

INFOBOX: MagicTips®

Wiha MagicTips® – Top of their class.

- Maximum grip: The special latching function preventing jumping away of the safety rings makes the Wiha circlip pliers truly unique.
- Hard as steel: Additional hardening of tips means high wear resistance and therefore excellent durability.
- Precise: Precision tips of high performance steel for maximum grip and high stability.

	Box

INFOBOX:
Electrostatic
conductive ESD tools

Sensitive, electronic components can be damaged even at a very low voltage.

- Dissipative tools by Wiha discharge the electrostatic energy in a controlled, safe manner.
- ESD tools meet the ESD Standard IEC 61340-5-1.
- ESD tool handles have a surface resistance of $10^6 - 10^9$ ohms.

Striking and measuring tools.

Optimum force transmission

With optimally uniform weight distribution, the Wiha electric hammer strikes a perfect balance and is also eminently suitable for use in confined working environments. Removing nails and nail clamps as well as fixing cables and dowels into position without causing damage become extremely simple tasks. Wiha's scaled impact screwdriver blade ensures that the portable dowel racket makes a perfectly dimensioned dowel hole to the required depth anywhere at any time without making a mess, unlike power tools.

Wiha measuring tools prove to be further dependable helpers during electrical installation work. The Wiha electrician's spirit level allows users to easily mark spaces for up to four flush boxes. This spirit level stands out due to its effortless dimension measurement and perfectly visible bubbles.

Application Striking and measuring tools.

INFOBOX: Colour code system for Wiha hammer faces

Safety note:

- Always wear safety glasses and safety gloves when working with soft-faced hammers. Please observe the applicable national standards and regulations.
- Please observe the following tightening torques when replacing heads or handles:

Size 30 = 20 Nm
Size 40 = 40 Nm
Size 50 = 70 Nm
Size 60 = 70 Nm
Size 80 = 80 Nm

Hammer face

soft (blue)

medium soft (black)

medium hard (yellow)

hard (orange)

very hard (white)

Application range

for sensitive materials, such as those in furniture and interior construction, minor assembly. Material: elastomer.

for robust work, such as paving, tiling, dry wall installation. Material: rubber.

universal use, such as for tool and machine manufacture, car repairs, sheet metal and assembly work. Material: polyurethane.

for high stress mechanical tasks such as assembly and dismantling work, building and construction work, repair work. Material: cellulose acetate.

for high impact work, heavy industry and construction, mould construction, road construction, horticulture and landscaping. Material: polyamide.

Electrician's hammer

with 300 g hammer head, in blister pack

846

Order-No.				
42071	23.9	283	500	4

INFOBOX: SoftFinish® dowel racket set with dowels

- Makes it easier to insert dowels and saves valuable working time.
- Ensures dirt- and dust-free work compared to machines.
- Galvanic separation between the blade and solid steel cap protects against electric shock.
- Perfect for portable use since you can make dowel holes anywhere at any time at the strike of a hammer.

INFOBOX: Electrician's hammer

- With its optimally uniform weight distribution, this hammer ensures perfect balance, delivering impact and fatigue-free work.
- Its flat claws make it easier to remove fastening components such as nail clamps, even from difficult-to-access spots.
- Optimum access into corners and confined spaces thanks to U-shaped striking surface.
- The flat hammer handle lower surface acts as a soft-faced hammer, ensuring components such as cables and dowels are fixed into position without causing damage.

Electrician's spirit level

40 cm				246
Order-No.				
42074	400	330	1	

INFOBOX:
Electrician's spirit
level, 40 cm

- Quick, easy marking of positions for up to four flush boxes in just one simple work step thanks to the integrated marking points.
- The continuous housing allows users to mark lines without interruption.
- An additional scale on the upper surface ensure precise measurement even when viewing from above.
- The bubbles are clearly visible, even from a sharp angle.
- The level is perfectly suitable for portable use thanks to its compact design.

Electrotechnical accessories

For a safe connection.

It is especially important for electricians to ensure that individual wires do not get crushed or misdirected when connecting fine-wired lines. If they do, there is a risk of cable breaks or even short circuits, which can potentially cause a fire. Wire-end sleeves can prevent such risks and provide reliable contacts, thus ensuring things work safely for the long term. The conical-shaped collar makes it easier to insert wires into the sleeve. The sleeve also makes it easier to insert the cable into the terminal. The twin wire-end sleeves are specifically designed for two-conductor connection. Wiha halogen-free wire-end sleeves offer heat resistance up to 105 °C.

Eminently suitable for connecting fine-wired lines, especially terminal connections.

With tool for stripping, skinning and trimming cables between 0.03 and 16 mm².

Pozidriv= Registered Trademark of European Industrial Services Ltd.

Ranges

-  Case strength
-  Wheel-along case
-  Case shape
-  Case suitable for transport by air

Electro

-  Torque safety check
-  Saves time

Screwdrivers

-  MagicRing®
-  MagicSpring®
-  Ball end can swivel up to 25°
-  slimTECHNOLOGY

Torque

-  Accuracy ±6%
-  Accuracy ±10%
-  slimTECHNOLOGY

L-keys

-  MagicRing®
-  MagicSpring®
-  Ball end can swivel up to 25°
-  TORX® ball end; can swivel up to 25°
-  Visible in UV light
-  95° Stubby

Bits

-  Suitable for impact screwdrivers
-  Lifespan 120 times longer
-  Visible in UV light

Pliers

-  Cutting-to-length diameter
-  Skinning diameter length
-  Automatic skinning
-  DynamicJoint®

-  Heavy-duty diagonal cutters
-  OptiGrip
-  MagicTips®
-  BiCut® Power
-  TriCut®

Impact tools

-  Optimum weight distribution
-  Soft hammer end
-  Levers out nail clamp

Measurement tool

-  Fully enclosed
-  Visible from just 10°
-  Visible in UV light

General information

-  Recommended for electricians – non-insulated
-  VDE-tested and certified
-  CE marking
-  ESD electronics mark
